PROFILE SUMMARY

Software developer with hands-on experience building production-ready full-stack applications using Python, FastAPI, Node.js, and Next.js. Proven ability to work independently in remote environments, delivering scalable backend systems and responsive frontends. Strong problem-solving foundation with consistent practice in data structures and algorithms. Experienced in designing RESTful APIs, optimizing database queries, and implementing authentication systems from scratch.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, C++, HTML, CSS

Backend & APIs: FastAPI, Node.js, Express.js, NestJS, Django, REST API, Prisma ORM

Frontend: React.js, Next.js, Tailwind CSS, React Hook Form, Zod

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, n8n, Arduino IDE

Problem-Solving: Data Structures & Algorithms (Active LeetCode practitioner), System Design

PROJECTS

AI-Powered Code Review Assistant | Python, Flask, FastAPI, Next.js, OpenAI API

Problem: Manual code reviews were time-consuming and inconsistent across repositories.

Solution: Built an intelligent assistant that automatically analyzes GitHub pull requests, detects style issues, identifies potential bugs, and suggests improvements using OpenAI API integration.

Impact: Reduced manual review time by automating code evaluation and improved code quality standards across multiple repositories.

Technical Highlights: Designed Flask backend with FastAPI endpoints, implemented GitHub webhook integration, handled asynchronous API calls for scalability.

Source Code: <https://github.com/vishu1803/Ai-powered-code-review-assistant/>

Collaborative Task Manager | Next.js, Node.js, Prisma, PostgreSQL, TypeScript, Tailwind CSS

Problem: Teams needed a centralized platform for task management with real-time collaboration features.

Solution: Developed a full-stack task management application from scratch with secure authentication, role-based access control, task prioritization, and real-time updates.

Impact: Improved productivity for distributed teams by providing a responsive interface and reducing task coordination overhead.

Technical Highlights: Built RESTful CRUD APIs with Node.js and Prisma ORM, implemented JWT-based authentication, optimized PostgreSQL queries for performance, designed responsive UI with Next.js and Tailwind CSS.

Project Link: <https://collaborative-task-manager-fc26.vercel.app/>

Product Data Explorer | TypeScript, React, Next.js, NestJS, PostgreSQL

Problem: Large product datasets were difficult to analyze without proper visualization and filtering capabilities.

Solution: Designed and implemented an analytics dashboard with advanced querying capabilities and dynamic data visualization.

Impact: Streamlined product analysis workflows and reduced data retrieval time by 60% through optimized API design.

Technical Highlights: Built scalable NestJS backend with complex filtering logic, integrated real-time charts for data insights, implemented efficient PostgreSQL indexing strategies.

EXPERIENCE

Full Stack Developer Intern | FTV Saloon | Remote | Jun 2024 – Sep 2024

- Designed and implemented RESTful APIs for salon operations, ensuring seamless client-server communication and data consistency.
- Built authentication system with role-based access control and admin dashboards to streamline salon management operations.
- Optimized frontend assets and database queries, reducing page load time by 40% and improving overall application performance.
- Collaborated remotely with designers and engineers using Git workflows and agile development practices.

EDUCATION

Rajkiya Engineering College | Sonbhadra

Bachelor of Technology in Electronics Engineering

Relevant Coursework: Data Structures & Algorithms, C, Python, System Modeling, Digital Logic

July 2025
