PROFESSIONAL SUMMARY

Full-Stack Developer adept at engineering end-to-end web applications, bridging responsive client interfaces with scalable backend APIs using TypeScript, React, Next.js, Node.js. Delivered full-lifecycle features across Collaborative Task Manager and AI-Powered Code Review Assistant, implementing authenticated REST APIs, relational persistence, and interactive user experiences. Maintains strong engineering fundamentals backed by daily practice in algorithmic problem-solving and clean system architecture.

TECHNICAL SKILLS

Backend & APIs: FastAPI, Fastify, Flask
Databases & ORMs: Prisma ORM, Redis, PostgreSQL, Drizzle ORM
Cloud, DevOps & Systems: GitHub Actions, Docker Compose
Languages: Python, JavaScript
Frontend & Web: Tailwind CSS

TECHNICAL PROJECTS

Collaborative Task Manager **GitHub**

TypeScript, Next.js, Express.js, Prisma ORM, PostgreSQL, Role-Based Access Control (RBAC)

- Designed and implemented high-performance RESTful CRUD APIs using Node.js and Prisma ORM, optimizing complex PostgreSQL queries to support real-time updates.
- Built a secure, full-stack task management platform with JWT-based authentication and fine-grained Role-Based Access Control (RBAC) for collaboration.
- Provided a responsive interface with real-time updates and an optimized database structure.

AI-Powered Code Review Assistant **GitHub**

Python, Flask, FastAPI, PostgreSQL, Redis, OpenAI API

- Developed an intelligent automated code review system by integrating OpenAI API to analyze GitHub Pull Requests, identifying style issues and suggesting bug fixes.
- Engineered a Flask backend with asynchronous FastAPI endpoints to handle real-time GitHub webhook integrations, ensuring high concurrency and application availability.
- Automated code evaluation across multiple repositories.

PROBLEM SOLVING & ALGORITHMIC PRACTICE

LeetCode Profile | *Data Structures & Algorithms* **LeetCode**

- 300+ LeetCode problems solved across core computer science topics (Dynamic Programming, Graphs, Trees, Arrays,
- Binary Search).
- Daily competitive programming and DSA practice to maintain interview readiness and a strong analytical foundation.
- Demonstrated proficiency in translating complex algorithmic solutions into production code for system optimization.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — FTV Saloon Jun 2024 – Sep 2024

Remote

- Designed and implemented robust RESTful APIs for core salon operations, ensuring reliable data consistency.
- Developed a secure authentication system featuring role-based access control (RBAC) and specialized admin dashboards.
- Optimized critical backend database queries and frontend asset loading, resulting in a 40% reduction in page load time.
- Collaborated remotely within an Agile development framework, using Git workflows for version control.

EDUCATION

Bachelor of Technology in Electronics Engineering 2021 – 2025-07

Rajkiya Engineering College

Relevant Coursework: Data Structures & Algorithms, C, Python, System Modeling, Digital Logic, Operating Systems, DBMS, Computer Networks
